

# GoldSeal™ Ultrasound

## Primary Care family of products

Versana Premier

Versana Balance

Versana Active

Versana Essential

Vscan Air

As the demand for medical imaging continues to grow, pre owned systems help meet an important need for those seeking costeffective imaging solutions. With the GE HealthCare GoldSeal refurbishment program for ultrasound, you can feel confident you are purchasing a quality system at a great value that only the original equipment manufacturer (OEM) can deliver.

With thousands of GoldSeal ultrasound systems in service around the world, you know our reputation. You can trust us to provide quality imaging equipment so that you can provide quality patient care.

Confidence comes standard with every GoldSeal system. It will perform comparably to new equipment.

GoldSeal pre-owned, refurbished systems offer you a smart use of resources, as well as:

- **Selective process:** Stringent selection standards ensure that only those systems with well-known and acceptable service histories qualify for GoldSeal
- **Quality:** Refurbishing completed by OEM factory-trained technicians who ensure all OEM specifications are met
- **One-year warranty:** Same warranty as on most new systems; service contracts available
- **Service/support:** Online assistance with questions, and local service
- **Up-to-date technology:** Refurbishing includes installation of latest possible software release and original OEM parts
- **Training:** Operation and application training is available, with optional CE Tech training credits

## Helping meet your imaging needs at an affordable price

### Versana™ Premier

An ultrasound partner you can trust, with world class imaging technology, outstanding imaging power and clarity to boost diagnostic confidence. Comprehensive service and support provides peace of mind — including 5-year warranty coverage. The Versana Premier is designed with you, your practice, and your patients in mind to meet your clinical, workflow and connectivity needs.

### Versana Balance

Practical and versatile, the Versana Balance supports a wide range of common ultrasound examinations and enables quick, efficient scanning for busy care environments. Whether you are working in a general practice office, hospital or other primary care setting, you can count on durable and dependable Versana Balance to deliver world-class care without compromising on image quality.

### Versana Active

Portability meets affordability in this lightweight, compact solution including a user-friendly backlit keyboard for dark-room scanning, and robust probe set featuring 12 different probes to meet a wide variety of scanning needs. The Versana Active includes advanced security and privacy protection for clinicals and patients with PHI encryption and Windows® 10 operating system.

### Versana Essential

A complete ultrasound solution — one you can learn to use quickly and productively. It enables confident clinical decision making for quick referrals and immediate clinical correlation — so you can scan a wide range of patients. Versana Essential is designed with long-lasting, reliably excellent imaging technology without compromising the quality and affordability you need.

### Vscan Air™

Vscan Air is a battery-operated general-purpose diagnostic ultrasound imaging system. It enables ultrasound imaging guidance, visualization and measurement of anatomical structures and fluid. Vscan Air consists of a dual-headed probe, which integrates both curved and linear array transducers, and an app that can be installed on Android™ or iOS® mobile devices. Its pocket-sized portability and simplified user interface enables integration into training sessions and examinations in professional healthcare facilities.
