

X-ray Virtual Education | Where do I start?

Enjoy the same instructor led training in our virtual learning classes.

The following virtual courses provide practical hands-on time with a Clinical Applications Specialist either from a quiet space on a computer or delivered directly on the XR system.

Courses with credits have been approved for Category A or A+ ASRT approved CE credits. All registered technologists who attend the entire course are eligible to receive CE credits. Total eligible CE credits are dependant on the duration of the course chosen.

These offerings are available through current training plans purchased with equipment or purchasable as separate offerings. Inquire upon registration.

Review the course descriptions by clicking the Course button for details. To schedule a course and for more information visit www.GEHealthCare.com
