

ViewPoint™ 6 DataStudio

Actionable insights that make a difference

To provide high-quality care and keep your hospital running smoothly, you and your team depend on consistent data access. But fragmented platforms, privacy regulations, legacy systems, and resource constraints make data management a complex and time-consuming task.

The costs and risks of inadequate analytics and data procurement can significantly hinder your team, organization, and revenue. Inefficient hospital operations may put patient safety at risk, strain your hospital's finances, and lead to overworked and unhappy staff, potentially damaging your hospital's reputation and quality of care.

Simplify access to essential data

ViewPoint 6 DataStudio¹ is a web-based analytics platform that allows you to effortlessly search, access and view ultrasound data directly from the ViewPoint 6 server. ViewPoint 6 DataStudio provides business-wide insights, including:

Operational data
to measure department performance
and optimize workflows

Accreditation and credentialing data
to track the number and quality of
performed ultrasound exams

With ViewPoint 6 DataStudio, you can:

- ✓ Perform data analysis without disrupting daily ultrasound reporting workflows
- ✓ Effortlessly access general statistics for any department using ViewPoint 6 and dedicated analytics dashboards tailored for EDs
- ✓ Access comprehensive data analysis in structured tables and/or graphics charts
- ✓ Tailor ultrasound data analysis to your department's needs
- ✓ With just a few clicks easily export query results to Microsoft® Excel-compatible formats

Meaningful analysis makes a difference

Effortlessly gain
valuable insights into
department performance

Instantly spot inefficiencies
in individual user performance, across
departments or multiple sites, to make
necessary operational adjustments

Leverage these insights
to save costs while boosting
increased profit potential

Optimize operations. Save costs. Maximize profits- without sacrificing patient care.
