# ViewPoint™ 6

**One solution.  
A world of difference.**

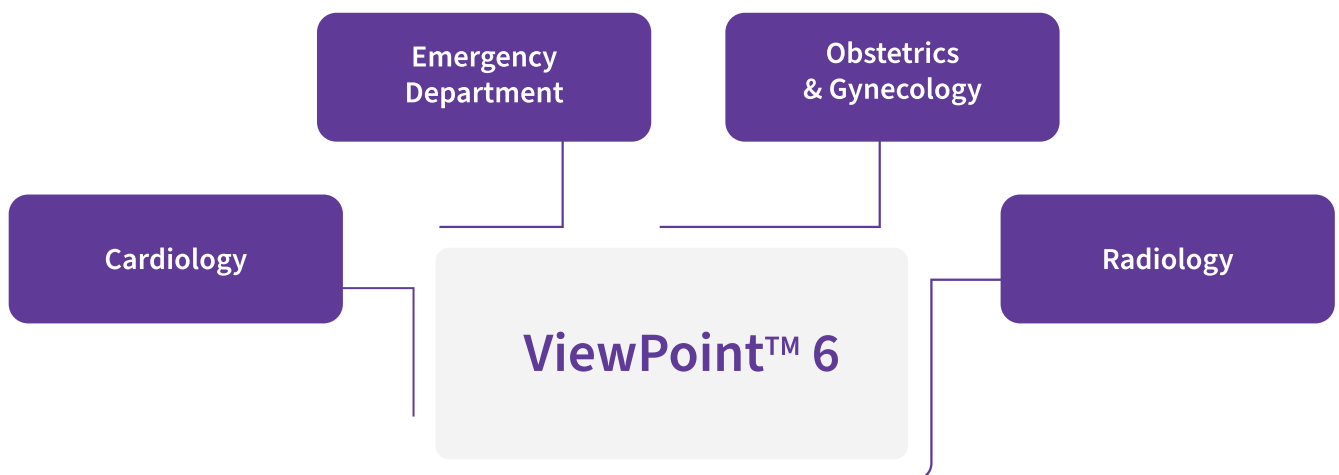

# ViewPoint™ 6

## makes a financial impact.

Staff shortages, escalating costs, and the pressure to continuously optimize your resources can feel like an endless juggling act.

Leveraging years of innovation, we designed ViewPoint 6 to offer a single, efficient ultrasound reporting and workflow solution for your entire hospital. Whether it's Obstetrics and Gynecology, Cardiology, Radiology, or your Emergency Department, ViewPoint 6 delivers a customizable, integrated, and scalable workflow solution.

Additionally, ViewPoint 6 offers configurable, exam-specific reporting templates based on deep clinical knowledge underpinned by more than 30 years of experience and close cooperation with the world's leading medical societies.

# The right investment makes a difference.

Delivering cost savings while increasing billing opportunities may sound like an impossible task.

Until now. ViewPoint 6 improves reporting accuracy and introduces workflow efficiencies that save valuable time across all departments where ultrasound is used, ultimately improving productivity and increasing billing opportunities.

# Emergency Department

When every moment matters, we make it faster and easier to capture information.

By integrating ViewPoint 6 for Point of Care reporting worksheets into the Venue™ scanner, we make it easier and faster to capture all relevant information.

- ✓ 79% time savings can be achieved through integrated reporting on the Venue family of ultrasound products over traditional manual documentation.<sup>1</sup>

<sup>1</sup>Based on 2022 simulated use internal study of encounter-based workflow with Venue R4 and ViewPoint 6 utilizing 8 timing workflows with and without encounter-based workflows.

- ✓ Smart ICD coding support, and standardized templates, help ensure that required reimbursement fields are filled out.

- ✓ ViewPoint 6 MobileConnect<sup>2</sup> allows to document exams performed using a Vscan™ Air, or another ultrasound device. This allows clinicians to quickly capture required documentation on their handheld device while they're still with the patient.

<sup>2</sup>Only available in the United States.

This saves clinicians time, and supports billing opportunities, helping to ensure Emergency Department scans are captured.

# Cardiology

When every detail matters, your clinicians require tools they can trust.

- ✓ The complexity of the echocardiography exam often requires cardiologists to be able to work with the study data after the patient has left the facility. We bring the power of Vivid™ ultrasound to your desktop by integrating the EchoPAC into ViewPoint 6. This eliminates the need to use the scanner for image post-processing and cardiac function assessment.
- ✓ Echocardiograms can generate very large data sets. ViewPoint 6 provides a reliable, secure, and scalable way to manage your echocardiography measurements and images, build comprehensive structured reports, and integrate into your hospital's infrastructure.
- ✓ In collaboration with leading societies worldwide, we have developed a solution that allows you to create consistent and accurate echo reports with a few clicks, maximizing quality and patient care.

“

**I've been able to become more efficient and streamline my productivity. I would not go back to the old system.**

Dr. Christos Mihos  
Cardiologist and Director of the Echo Lab  
Mount Sinai Medical Center, Miami Beach, Florida

# Radiology

When a syllable matters, it is often too easy for things to get lost in translation.

## Did you know?

- ✘ More than 1 in 5 radiology reports contain errors<sup>3</sup>.
- 📄 Up to 20% of abdominal ultrasound reports have incomplete physician documentation<sup>4</sup>.
- 💰 Up to 5.5% loss in income can be attributed to incomplete ultrasound reporting<sup>5</sup>.
- 🕒 On average, sonographers spend only 39% of their day on scanning activities<sup>5</sup>.

<sup>3</sup>Frequency and Spectrum of Errors in Final Radiology Reports Generated with Automatic Speech Recognition Technology; Quint, Leslie E. et al.; Journal of the American College of Radiology, Volume 5, Issue 12, 1196 - 1199.

<sup>4</sup>Physician Documentation Deficiencies in Abdominal Ultrasound Reports: Frequency, Characteristics, and Financial Impact Richard Duszak Jr, MDa,b, Michael Nossal, MAC, Lyle Schofield, BSc, Daniel Picus, MDd.

<sup>5</sup>Analysis of Lost Sonographer Productivity in a University Hospital Vascular Laboratory; The Journal for Vascular Ultrasound 39(2):78-80, 2015; Kaitlin Hoffman, RVT;1 Julie Evans, RVT;2 Preston Kershner, RVT;3 Mounir J. Haurani, MD, RPVI;1,2 Bhagwan Satiani, MD, MBA, RPVI1,2.

## ViewPoint 6 can provide your hospital with substantial costs savings:

- ✓ Electronic sonographer worksheets can simplify communication, allowing for efficient flow of patient information between Radiology and referring departments.
- ✓ Transfer of ultrasound measurements and findings directly into the dictation system saving time and reducing opportunity for transcription errors.
- ✓ The automated workflow and data transfer also eliminates the need for manual entries and helps to minimize dictation time, keeping your physicians focused on reading their exams.
- ✓ Complete and accurate reports can also help improve billing opportunities.

# Obstetrics & Gynecology

In a world where every decision matters, it's important for your staff to have critical information at their fingertips.

ViewPoint 6 started more than 30 years ago in OB/GYN because of the critical need for accurate documentation and comprehensive reports.

- ✓ Robust integration ensures images and measurements from the ultrasound systems pre-populate in ViewPoint 6 so your staff can work efficiently and document exams accurately.
- ✓ ViewPoint 6 leverages partnerships with professional societies (like AIUM, FMF) so your clinicians can be confident in the calculations and algorithms.
- ✓ Inherent quality and configurability ensure your staff can optimize their workflow.

“

**Being able to customize the program has been incredibly helpful & shaved minutes off of every exam. Because the sonographers don't have to take additional time after the exam to prepare the initial report, there is little downtime for the patient or the ultrasound room.**

Dr. Daniel Kiefer  
Maternal Fetal Medicine specialist  
Women's Care Florida, Orlando

# One solution from a trusted partner makes a difference.

## Standardization:

- ✓ ViewPoint 6 can help you save money by providing one ultrasound reporting and workflow solution that works across all your hospital's care areas.
- ✓ ViewPoint 6 can help you save time in vendor management and IT administration.

## Integration:

- ✓ Full integration into your existing IT environment minimizes complexities.

## Support:

- ✓ Onsite expert implementation
- ✓ System stability
- ✓ Robust cyber security
- ✓ Convenient and reliable support when you need it

## ViewPoint™ 6: The difference

ViewPoint 6, a single reporting and workflow solution for your entire hospital, underpins our unwavering commitment to creating a world where healthcare has no limits.
