

Delivering high productivity with quality in a sustainable way with Imaging 360

Goal: Enhance patient satisfaction and accessibility without altering operating hours, staffing levels, or compromising on diagnostic imaging capabilities.

Dr. Pedro H. Quintino

Regional Medical Coordinator
Radiology Rede D'Or São Paulo

“The ecosystem of solutions, combined with consulting, synergistically worked with our team from reception, operation, and even the radiologist's report, allowing for a reduction in scheduling time, resulting in a significant increase of 30% in installed capacity.”

Adoption of new technology

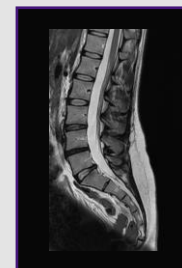

Imaging 360 was used to assess AIR™ Recon DL. All devices showed a considerable reduction in exam durations by anatomical groups, a

35% average

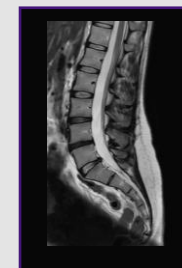

reduction in exam time was achieved*

Maintaining the image quality

Using 1.5 & 3T MRs, an IQ assessment was conducted to assess the algorithm's efficacy in relation to IQ. The radiologist's Net Promoter Score was initially 15% and reached 96%.
