Tube Watch
for Image Guiding Solutions

Reduce disruptions. Enhance care.

We understand that unplanned downtime may create significant disruptions on your schedule and impact patient care.

Unforeseen tube or X-ray generation chain failures are causing an average of **5** canceled procedures[1]

We can help

Tube Watch is an **AI based and digital twin technology** that remotely monitors your system 24/7.
Tube Watch sends alerts, and **predicts when potential tube and x-ray** chain failures may happen and thus, gives enough time before failures happen.

Tube Watch allows **proactive parts replacement** and service scheduling at your **most convenient time**, avoiding the risk of your **system being down** during your **invasive procedures**.
Innovative technologies that help predict and prevent failures on IGS system

From Break & Fix to Predictive Services
Unplanned downtime reduction
